Open the St. Pete Way Safety Plan

COVID 19 SAFETY

In an effort to protect fellow team members and our customers, it is Uptown Snoballs' policy to strictly follow the below safety measures:

- Should you have symptoms consistent with COVID 19; a fever in excess of 100.4 degrees, cough, loss of smell, muscle aches, fatigue, etc, please inform us and DO NOT COME TO WORK.
- When arriving to work, your shift manager will take your temperature. Should your temperature exceed 100.4 degrees, you will immediately be sent home.
- While at work, you must always wear a face mask and gloves. Always.
- You must always wash hands before putting on gloves.
- You must always change gloves after handling cash, credit cards, or after touching any unsanitized objects.
- Regularly disinfect all surface areas, including cash register, point of sale screen, counters and door handles.
- Wipe down outdoor tables and chairs with disinfectant spray every time a customer leaves the table. Disinfectant spray is kept outside with paper towels and hand sanitizer for the customer’s use should they want to wipe down the table and chairs themselves.
- Be safe. Social distance from team members and customers, wash your hands regularly and don’t touch your face. Your and our customers’ health and safety is our number one priority.
